

Post Transporter Carts

The easiest & safest way to transport and store posts.

Visiontron's innovative system to transport Crowd Control Posts.

Too many times we have seen floors scuffed from posts being dragged on them. Some posts get damaged from accidental drops and rough handling. Other times, stanchions are ruined due to cleaning liquids getting on the bases. On top of all of these costly issues, it takes a while to remove posts and then set them up again. All of these problems can be solved by using a **Post Transporter Cart**.

Our **Posts Storage Carts** are the ideal means of transporting and storing Retractable-Belts® and other stanchions. The easy to wheel carts limit damage to products and floors since the posts do not have to be carried everywhere.

Vertical Post Storage Cart

The vertical storage position allows you to set up and break down posts in a quick, efficient and safe manner. Simply lift the post straight up. There is no need to rotate or flip awkwardly weighted posts upside down to transport them.

- ▶ **Holds 18 posts on an easy to load and roll cart**
- ▶ **Vertical storage:** the easiest and safest way to load posts.
- ▶ **Posts only require a 16" lift to load the cart:** this reduces potential back injuries
- ▶ **No assembly required:** other carts can take up to two hours
- ▶ **Compatible with most manufactures' posts**
- ▶ **Protective:** padded surface prevents scratches and rubber straps secure posts in place

VPSC-18**

Mini & Deluxe Post Storage Cart

The Mini Post Storage Cart is our most economical unit and provides the easy transportation and storage of up to 12 stanchions. The Deluxe Model can store up to 21 stanchions.

- ▶ **Holds 12 (Mini) & 21 (Deluxe) posts on an easy to roll cart**
- ▶ **Mini Cart ships by UPS or FedEx**
- ▶ **Compatible with most manufactures' posts**
- ▶ **Padded surfaces:** protect the post finish
